

EVO frame series

Datasheet

FRAME-EVO-P20

EVO frame series

for Epson & Panasonic projectors

- ▶ new easily convertible design
- ▶ improved adjustments
- ▶ full stacking compatibility with earlier frame models
- ▶ built-in galvanic insulation
- ▶ DGUV V17 verified

FRAME-EVO-E10

FRAME-EVO-E10

FRAME-EVO-P20

FRAME-EVO-P20

The newest frame generation is the EVOLution of the very-well known earlier frame series. The system has been redesigned from scratch. The result is a very similar look with some major advantages. It is fully backwards-compatible for stacking and has nearly the same outer dimensions. The convertible design makes it simple to remove the upper ring for the use with ultra short throw lenses. For this process, there are no additional tools necessary and there are no parts to lose. Galvanic insulation from the projector housing to the trussing is built-in, so there is no need for plastic washers to avoid electrical ground loop problems. This simplifies the mounting of the projector into the frame. Furthermore, adjusting the projector in the frame is more precise with less unwanted play. Of course the EVO frame series is DGUV V17/V18 verified and has been subjected to a complete static analyses.
